Climate

Climate Zone

5A: Cool,
Humid

Feasibility Score

81

EXCELLENT

+11 vs benchmark

GSHP FEASIBILITY SCORE / 100

Soil conductivity	32 / 40 pts
Climate balance	22 / 30 pts
Ground temperature	17 / 20 pts
Building suitability	10 / 10 pts

Cost & Savings

GSHP SYSTEM

\$1,840,000

vs.

CONVENTIONAL

\$920,000

Peak design load

Drilling & loops · \$1,120K
Heat pumps · \$480K
Distribution · \$240K

Boiler · \$380K
Chiller · \$510K
Distribution · \$130K

Net 30-yr savings

\$620,000

COOLING

358 kW

Peak design load

200 kW

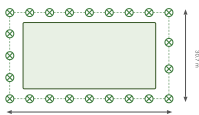

PEAKER

149 kW

Chiller Jan Feb Mar Apr May Jun
